

# Regional Inception Workshop for the SEAFDEC/UNEP/GEF Project: "Establishment and Operation of a Regional System of Fisheries Refugia in the South China Sea and Gulf of Thailand"

Bangkok, Thailand, 1<sup>st</sup> – 3<sup>rd</sup> November 2016

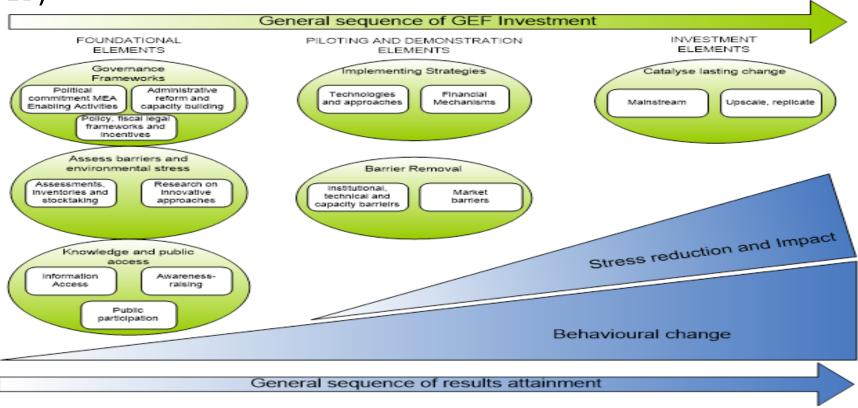

Agenda Item

5. DEVELOPING A RESULTS-BASED MANAGEMENT SYSTEM FOR THE FISHERIES REFUGIA PROJECT

5.1 Consideration of GEF and UNEP minimum standards for monitoring and evaluation

#### What drives the GEF overall....

GEF supports the generation of Global Benefits to the Environment (GEB)

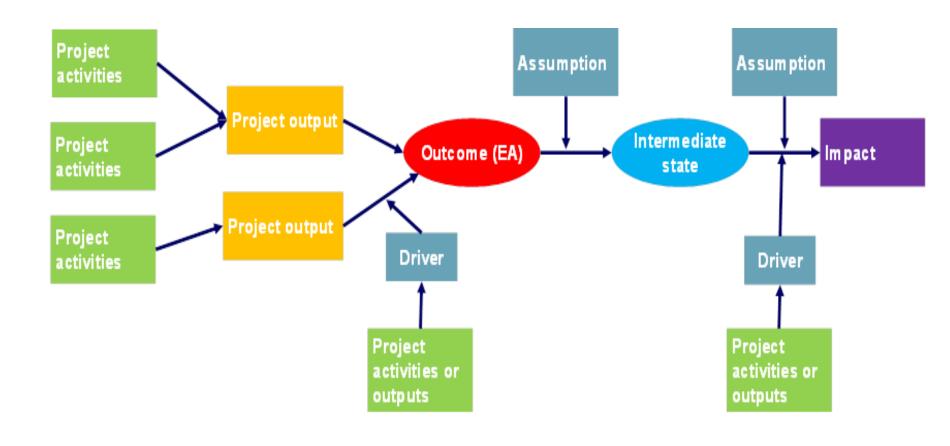

## What drives the GEF and UNEP M&E process....

## Importance of result based management systems....

- Through the information and evidence-based tools provided by project <u>results-based</u> <u>management systems</u>, the GEF can systematically improve its effectiveness and target its resources more strategically
- A results based management system is "a management strategy focusing on performance and achievement of outputs, outcomes, and impacts".

Components	Outcomes	Indicator	Baseline	Targets End of Project	Source of Verification	Risks and Assumptions
4. National and regional cooperation and coordination for integrated fish stock and critical habitat management in the South China Sea and Gulf of Thailand	Cost-effective and efficient coordination of national and regional level cooperation for integrated fisheries and environmental management	Extent and continuity of stakeholder participation in meetings of project management bodies, including the scope and uptake of joint management and planning decisions	Lack of national and regional-level mechanisms to facilitate integration of fisheries management and biodiversity conservation	Effective multi- lateral and intergovernment al communication and joint decision- making, including the use of a consensual knowledge-base in planning ecologically and cost-effective management actions	Regular reports of meetings of national and regional project management bodies Reports of independent mid-term and terminal project evaluations	Consultative processes will elicit adequate stakeholder input and commitment of support from national networks to enable integrated management

## **Indicators/Targets**

#### **EFFECTIVE INDICATORS SHOULD BE 'SMART'**

**Specific** enough to assess the progress and taking into account the target group (for whom) and location (where);

**Measurable** - reliable and clear measurement is possible that can specify quantity (how much) and/or quality (how well);

**Attainable** - credible link to results and **Attributable** to the intervention, the indicator is measuring project performance and not something that might have 'happened anyway';

Relevant to the intended outputs and outcome; and

**Time-bound** (by when) and **Trackable** (availability of data within reasonable cost and effort).

#### **Baseline**

"In **project management** there are three baselines: schedule **baseline**, cost **baseline** and scope **baseline**. The combination of all three baselines is referred to as the **performance measurement baseline**. A **baseline** is a fixed schedule, which represents the standard that is used to measure the performance of the **project**."

6months to 1 year upon project start

## **M&E** process

- Monitoring and evaluation are critical tasks in the life of a project and rely heavily on the Results-Based Management system.
- Monitoring is a management tool
- It provides management and the main project stakeholders with <u>indications</u> of the extent of <u>progress and achievement</u> of objectives and progress in the use of allocated funds

## **M&E** process

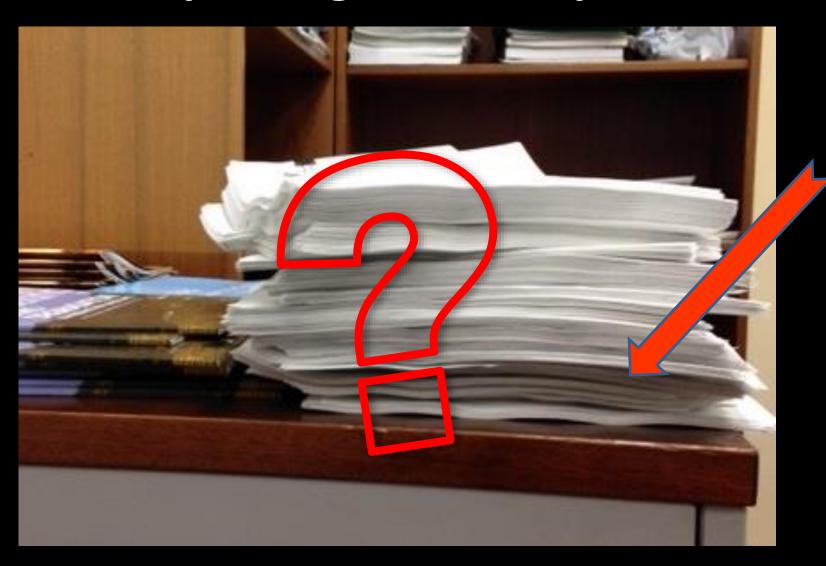

- Evaluation as defined by OECD-DAC is "The systematic and objective assessment of an ongoing or completed project, its design, implementation and results. The aim is to determine the relevance and fulfillment of objectives, development efficiency, effectiveness, impact and sustainability."
- Evaluation is an exercise conducted independently of the managing office.

## "Unpacking the M&E plan"

## **M&E** process

#### **Project Design and Inception**

Development of Logframe, Results Framework, and Monitoring and Evaluation Plan

#### **Implementation**

Monitoring of Progress, Adaptive Management, Course Correction as Directed by Steering Committee and Mid-Term Evaluation

#### **Evaluation**

Overall Assessment of
Project Relevance,
Effectiveness,
Efficiency, Results, and
Sustainability

#### Adaptation/adaptive management

Project Management, Monitoring, Reporting, Recording Lessons

Lessons learned; good practices

## Comprehensive monitoring and reporting plan

## **Day to day Monitoring**

- PCU regular calls/F2F meetings/ visits with countries and partners
- Annual, or more frequent, Steering
   Committee meetings or other advisory body meetings

#### Comprehensive monitoring and reporting plan

#### **Periodic Reporting**

- QOR Every Quarter + 8 day +15 days
- PIR Every year by 31 July
- "Tracking Tools" at beginning, middle and end of a project
- Terminal Report by project closure
- QER Every Quarter + 8 day +15 days
- Audit report Annually

#### Source of inputs to PCU

- National Interventions PMU
- Partners under contract

#### PIR

- Review annual evaluation
- Rating project DO IP Risk M&E LL
- Tracking Tool report (Midterm end of project life)
- Co-financing report (co-financing tracking system)

## Source of inputs to PCU

- National Interventions PMU
- Partners under contract

Comprehensive monitoring and reporting plan

#### **Evaluation**

- Midterm independent evaluation
- Terminal independent evaluation

#### **Others**

Experience note, case studies, videos, comms products

## Thank you
